

Ultimate Team 3!

Nicholas and Mahendra

Product Backlog

ID	User Story	Priority	Estimate
37	As a developer, I want to be able to set the level of employee hierarchy based on their company position	5 pt	4
27	As a manager/employee, I want to be able to login using my email and password	5 pt	5
34	As a manager/employee, I want to be able to reset password if forgotten.	5 pt	4
38	As a manager, I want to be able to include different types of questions for the survey	4 pt	3
35	As a developer, I need to make the <i>website State diagram</i> which will gives customer clear understanding of pages organization	2 pt	1
36	As a developer, I want to be able to see, store/retrieve manager, employee and survey data ready in the Database	2 pt	2

● This Sprint

- Round Trip data flow from creating to finishing.
- Determine manager/employee role upon login
- Dynamic Dashboard Tab for employee/manager
- Login cookie/session and forgot password

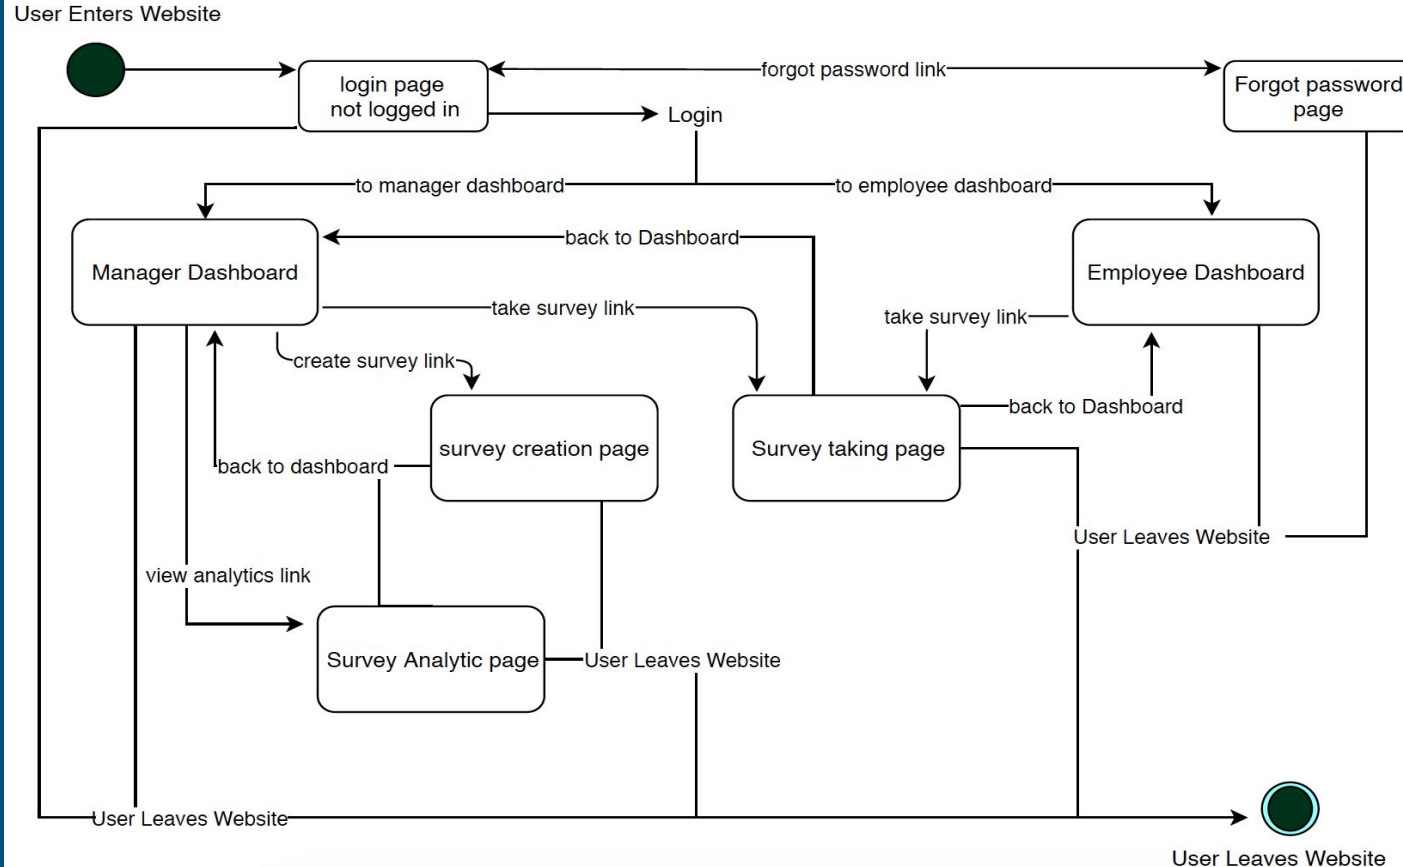

● What's Next

- Analytics
- Scalability, accessibility and testing
- Extra layer of Security

State Diagram

Ultimate Survey state diagram

What's New

- Trello for our sprint management
- Heroku to extend our application
